Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 31-33 and 36-45 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claim 31, is deemed directed to an article of manufacture, being a computer program carrier readable by a computer for performing the method.

Claim 31- are deemed non-statutory, in view of applicant specification page 7, paragraph 3, lines 20 and paragraph 4 line 28, which indicate that the claims cover wherein the medium can be a carrier or signal, therefore a form of energy.

Since the instant Specification as pointed above provides examples of an, "carrier". This signal can be interpreted to be inclusive of a form of energy. Energy is not one of the four categories of invention and therefore the claims are not statutory.

Energy is not a series of steps or acts and thus is not a process. Energy is not a physical article or object and as such is not a machine or manufacture. Energy is not a combination of substances and therefore is not a composition of matter.

Allowable Subject Matter

2. Claims 1-3, 6-18, 21-30 are allowed.
